

Defense Occupational and Environmental Health Readiness System (DOEHRS) Training & Support

Providing Service that Improves Health Preparedness

DOEHRS is the Air Force required Management Information System for all Occupational and Environmental Health data entry, management and reporting. Recently, reporting requirements (Metrics) are being tracked to determine OEH program effectiveness.

ASG has developed a standardized "over-the-shoulder" approach to DOEHRS training which works by explaining, demonstrating, coaching and then checking student's data entry so that DOEHRS users get not only the concepts but the key-strokes. All the training is done using the actual data so not only is training accomplished but data is cleaned up and entered. Those trained are left with "short cut" guides to remind them of critical elements without requiring them to review a user's manual. The training has been developed to help installations maximize all of the functional aspects of DOEHRS: effective use of data management, entry of high quality data, and capturing the appropriate information to accurately reflect in crucial metrics.

The advantage to the ASG training is that it is modular: you determine which training modules you need at your installation to improve your overall effectiveness in DOEHRS. We will custom fit the training to your needs and to focus only on those areas where you need the most improvement. Modules are typically four or eight hours in length and are summarized below. Other modules can also be developed.

ASG is a highly-reputable, small business that provides professional services to all levels of corporate entities, government, and international organizations. Founded in 2005, ASG has grown rapidly by employing specialized subject matter experts who provide premier industrial hygiene, occupational health, safety, and emergency management services.

SERVICES

- DOEHRS Training & Implementation
- Modular Support
- Data Assessment
- OEH Data Entry
- Data Quality Control
- Quick Start Guides

BENEFIT

"Identify threats capable of impacting the health of people and jeopardizing their ability to execute mission tasks"

4 Hour Modules	8 Hour Modules
<ul style="list-style-type: none"> • Standardization & Data Quality • Master Schedule/WMP • Deficiency Management • Respiratory Protection • HAZCOM • Drinking Water Surveys • Data Clean Up (Various) 	<ul style="list-style-type: none"> • Processes, Hazards, & Controls • Ventilation • Ionizing Radiation • LASERS • EMF

ASG MISSION

We Prepare Communities for Tomorrow's Threats

ASG VISION

Communities Prepared with Innovative Solutions Backed with Lasting Relationships

Corporate Values

Integrity
 Exceptional Service
 Innovation
 Continuous Improvement
 Integration of Capabilities
 Stewardship
 Respect/Honor
 Forgiveness
 Accountability
 Trust

Customer Reviews

"My techs now have the "know how" to better manage DOEHRs and the data"

Source: USAF Bioenvironmental Engineer

"The DOEHRs training and data entry support was very useful. ASG focused on our weaknesses and helped us become stronger and better at our job"

Source: USAF Senior Bioenvironmental Engineer Technician

"I could not use DOEHRs to schedule ventilation surveys, but ASG fixed the problem and now everything is working; awesome training and support"

Source: USAF Bioenvironmental Engineer Technician

"ASG helped me with the respiratory protection module in DOEHRs, which will reduce the amount of time to update in half; thank you so much for your help"
